1 DIRECTIVE

DECLARATION OF CONFORMITY
ESAB AB, Welding Equipment, SE-695 81 Laxå, Sweden, gives its unreserved guarantee that the
welding torch/welding gun MXL 150v, MXL 200, MXL 270, MXL 340 are constructed and tested
in compliance with the standard EN 60974-7 in accordance with the requirements of directive
(2006/95/EC).

Laxå 2007-03-08

Kent Eimbrodt
Global Director
Equipment and Automation

2 SAFETY

Users of ESAB welding equipment have the ultimate responsibility for ensuring that anyone who
works on or near the equipment observes all the relevant safety precautions. Safety precautions
must meet the requirements that apply to this type of welding equipment. The following recommenda-
tions should be observed in addition to the standard regulations that apply to the workplace.

All work must be carried out by trained personnel well-acquainted with the operation of the welding
equipment. Incorrect operation of the equipment may lead to hazardous situations which can result
in injury to the operator and damage to the equipment.

1. Anyone who uses the welding equipment must be familiar with:
   • its operation
   • location of emergency stops
   • its function
   • relevant safety precautions
   • welding

2. The operator must ensure that:
   • no unauthorized person is stationed within the working area of the equipment when it is
     started up.
   • no-one is unprotected when the arc is struck

3. The workplace must:
   • be suitable for the purpose
   • be free from drafts

4. Personal safety equipment
   • Always wear recommended personal safety equipment, such as safety glasses, flame-proof
     clothing, safety gloves.
   • Do not wear loose-fitting items, such as scarves, bracelets, rings, etc., which could become
     trapped or cause burns.

5. General precautions
   • Make sure the return cable is connected securely.
   • Work on high voltage equipment **may only be carried out by a qualified electrician.**
   • Appropriate fire extinguishing equipment must be clearly marked and close at hand.
   • Maintenance must **not** be carried out on the equipment during operation.
WARNING

ARC WELDING AND CUTTING CAN BE INJURIOUS TO YOURSELF AND OTHERS. TAKE PRECAUTIONS WHEN WELDING. ASK FOR YOUR EMPLOYER'S SAFETY PRACTICES WHICH SHOULD BE BASED ON MANUFACTURERS' HAZARD DATA.

ELECTRIC SHOCK - Can kill
• Install and earth the welding unit in accordance with applicable standards.
• Do not touch live electrical parts or electrodes with bare skin, wet gloves or wet clothing.
• Insulate yourself from earth and the workpiece.
• Ensure your working stance is safe.

FUMES AND GASES - Can be dangerous to health
• Keep your head out of the fumes.
• Use ventilation, extraction at the arc, or both, to take fumes and gases away from your breathing zone and the general area.

ARC RAYS - Can injure eyes and burn skin.
• Protect your eyes and body. Use the correct welding screen and filter lens and wear protective clothing.
• Protect bystanders with suitable screens or curtains.

FIRE HAZARD
• Sparks (spatter) can cause fire. Make sure therefore that there are no inflammable materials nearby.

NOISE - Excessive noise can damage hearing
• Protect your ears. Use earmuffs or other hearing protection.
• Warn bystanders of the risk.

MALFUNCTION - Call for expert assistance in the event of malfunction.

READ AND UNDERSTAND THE INSTRUCTION MANUAL BEFORE INSTALLING OR OPERATING.

PROTECT YOURSELF AND OTHERS!

ESAB can provide you with all necessary welding protection and accessories.

3 INTRODUCTION

The MIG / MAG welding torches of this series are exclusively intended for shielded-arc welding using inert gas (MIG) or active gas (MAG) for industrial and commercial use by suitably trained employees. The torches are only available in manual versions.

4 SHIPMENT AND PACKAGING

The components are carefully checked and packaged however damage may occur during shipping.

Checking procedure on receipt of goods
• Check that the shipment is correct by referring to the shipping note.

In case of damage
• Check the package and components for damage (visual inspection).

In case of complaints
If the package and/or components have been damaged during shipment:
• Contact with the last carrier immediately.
• Keep the packaging (for possible inspection by the carrier or supplier, or for returninng the goods).
Storage in an enclosed space

Ambient temperature
- for shipment and storage: - 25 °C to +55 °C
Relative air humidity: up to 90% at a temperature of 20 °C

6 OPERATION

General safety regulations for the handling of the equipment can be found on page 4. Read them before you start using the equipment!

WARNING!
This product is intended for industrial use. In a domestic environment this product may cause radio interference. It is the user’s responsibility to take adequate precautions.

MXL welding torches can be used in any welding position.

The torch switch in the MXL handle is suitable for 42 V, maximum 1 A.

6.1 Fitting the liner

Fit the correct wire guide liner for the application, as needed to suit the wire type and diameter, see 7.3.

For information on how to install new liners and about correct assembly procedure, see the chapter entitled “Maintenance”

Spiral liner = for steel wires
PTFE-liner = for aluminium, copper, nickel and stainless steel wires

6.2 Assembling the swan neck

The following figures indicate how to assemble the different welding torch types.

MXL 150v

MXL 200

MXL 270

MXL 340

6.3 Fitting the central adaptor assembly to the equipment

1. Check that the wire guide liner is fitted correctly.
2. Insert the central plug into the socket on the wire feed unit and secure it by tightening the adaptor nut firmly.

6.4 Setting the level of shielding gas

Set the quantity of gas required on the gas regulator. The type and quantity of gas to be used depend on the welding task to be performed.

6.5 Checklist

- Check the cable assembly before connecting it to the wire feed unit to confirm the wire liner is suitable for the wire diameter and type.
- Check the fixed end consumable parts on the swan neck, whether the correct contact tip etc. is being used for the wire diameter and type.

6.6 Changing wire

- When changing the wire, ensure that the end of the wire is deburred.
- Insert the wire into the wire feeding unit in accordance with the operating instructions.
- When inserting the wire, press the wire jog button on the wire feed unit.

7 MAINTENANCE

Regular maintenance is important for safe, reliable operation.

Welding torch

- Cleaning and replacement of the welding torch’s wear parts should take place at regular intervals in order to achieve trouble-free wire feed. Blow the wire guide clean regularly and clean the contact tip.

   Before carrying out cleaning, servicing and repair work, the following shutdown procedure must be followed.

   1. Switch off the power supply.
   2. Close off the gas supply.

   Make sure that the power supply and gas remain turned off all the time while servicing the machine.

7.1 Cable assembly

- Check that all the nuts are tight.
- Replace the liner if it is worn or dirty.
- Replace damaged, deformed or worn parts.
7.2 Cleaning the wire feed

- Disconnect the torch cable assembly from the equipment and lay it out straight.
- Unscrew the nut and pull out the wire guide liner. Remove other parts from the swan neck.
- Blow compressed air through the wire conduit from both ends in order to remove wire shavings.
- Insert the liner into the wire conduit and screw the nut back on.

New liners must be cut to the correct length. Please follow the following tips and suggestions:

7.3 Spiral liner / PTFE liner

1. Unscrew all the fittings from the swan neck.
2. Unscrew the union nut on the central plug.
3. Remove the old liner, and then push the guide spiral liner through the hose as far as it will go. Make sure the cable is stretched out more or less straight.
4. Tighten the union nut by hand.
5. Cut the overhang off the spiral at the swan neck and remove the guide spiral liner again.
6. For a smooth transition to the contact tip, grind the end of the spiral to an angle of approx. 40°. Deburr the cutting edge.
7. Push the sharpened guide spiral liner through the hose to the holder nipple.
8. Screw the union nut into position and tighten it using the multiple spanner.
9. Screw the fittings back on again.
7.4 Cleaning the swan neck

- Clean the inside of the gas nozzle regularly to remove welding spatter and spray with ESAB® anti-spatter agent.
- Check the consumables for visible damage and replace if necessary.

8 FAULT-TRACING

If the measures described below are not successful, please consult your dealer or the manufacturer.

*Please also read the operating instructions for the welding components, e.g. power source and wire feed unit.*

<table>

</tbody>
</table>
9 DISASSEMBLY AND DISPOSAL

Do not dispose of electrical equipment together with normal waste!
In observance of European Directive 2002/96/EC on Waste Electrical and Electronic Equipment and its implementation in accordance with national law, electrical equipment that has reached the end of its life must be collected separately and returned to an environmentally compatible recycling facility. As the owner of the equipment, you should get information on approved collection systems from our local representative.
By applying this European Directive you will improve the environment and human health!

The welding torch system is mainly made from steel, plastics and non-ferrous metal, and must be disposed of in accordance with local environmental regulations.

10 IN THE EVENT OF AN EMERGENCY

In the event of an emergency, the power supply must be switched off immediately.
For further action in such circumstances, consult the ‘Power source’ Instruction manual.

11 ORDERING OF SPARE PARTS

MXL 150v, MXL 200, MXL 270, MXL 340 is designed and tested in accordance with the international and European standards IEC-/EN 60974-7 It is the obligation of the service unit which has carried out the service or repair work to make sure that the product still conforms to the said standard.

Spare parts may be ordered through your nearest ESAB dealer, see the last page of this publication.
