Welcome to Life on the Edge

EDGE™ SERIES

VICTOR® Professional

User Friendly
Advanced Design
Outstanding Flow Performance
Unsurpassed Safety
**User Friendly**

- Easy to use adjusting knob
- More natural and safer hand/body position while adjusting delivery pressure
- Gauges feature high contrast graphics for a quick read
- Color-Coded for quick identification of gas type

**Advanced Design – Durable and Compact**

Most regulators have multiple impact points. The Victor Professional Edge Series has a single controlled impact point. The Edge is smaller, lighter and more compact. The unique configuration protects all elements critical to system integrity including:

- High and low pressure gauges built in and recessed into the body for protection
- High-strength diaphragm assembly
- Seat mechanism
- Safety relief valve
- Outlet hose connection

The internal vent system of the regulator is designed to protect from weather elements. It is recessed and channeled for water run-off and protected under the adjusting knob.
Outstanding Flow Performance

It’s easy for a regulator to maintain good flow performance when inlet pressures are high, but cylinder pressure decay is inevitable. A regulator needs to perform well across the entire range of cylinder pressures. This is where the Edge regulator outperforms the competition.

- Better flow control across a full range of cylinder pressures
- Exceptional sensitivity and precision in delivery pressure control

Unsurpassed Safety

The Victor Professional Edge Series regulator meets or exceeds all industry standards. It passes all CGA E-4 compliance testing, including the Heated Oxygen Impact Test and all requirements of the UL 252 Standard for Compressed Gas Regulators. The Edge regulator has the highest resistance to oxygen related fires in the industry. It passes the stringent ASTM G-175 promoted ignition test. It is fault tolerant in the event of an inboard ignition source in oxygen use. The Edge Series regulator offers unsurpassed resistance to oxygen combustive contamination.

- Meets or exceeds industry standards
- Passes the stringent ASTM G-175 promoted ignition test

Warranty: 5 Years

Shock Absorbing Knob

The Victor Professional Edge Series regulator features SLAM™ (Shock Limitation and Absorption Mechanism) technology built into the adjusting knob. This revolutionary technology protects regulator vitals and cylinder in the event of an accident.
