# When you want the best, accept no substitutes.

A legacy of innovation, reliability and commitment that will last for years to come. TurboTorch is designed and built for professional grade performance in the HVAC and plumbing markets. Known for product excellence and user safety, TurboTorch has earned the same distinction as Victor Equipment Company.

## TURBOTORCH OFFERS:

- Extreme Swirl Technology (burns hotter and cleaner)
- Highest heat output temperatures available
- Pure, clean flame
- Instantaneous working temperatures
- Consistent target temperatures
- Durable and innovative design & engineering
- Three-year warranty

## INNOVATIVE MARKET LEADERS

Professionals count on TurboTorch innovative design, engineering and manufacturing. The patented Extreme Swirl Technology completely burns the fuel inside the flame tube. The result is a pure working flame that is non-oxidizing and non-carbonizing.

This chart shows thermal imaging comparisons of TurboTorch Extreme air acetylene tips along with comparable tips offered by two other manufacturers.

## MAPP®/PROPANE TORCHES

TurboTorch began by manufacturing MAPP/Propane torches for professional plumbing and continues to dominate in this industry. TurboTorch is the torch that plumbing and HVAC professionals rely on to get the job done.

- *Balanced and lightweight ergonomic design (easy to use and it reduces arm fatigue)*
- *Two sizes (meets the needs of any job)*
- *Reaches working temperatures faster*
- *Rotating tip (allows more flexibility)*
- *Durable flame holder*

## AIR ACETYLENE TORCHES

TurboTorch also offers a wide range of air acetylene torches, tips and kits. Ideal for the HVAC industry.

- *Self-lighting and standard torches*
- *Full range of tips and accessories*
- *Acetylene burns hotter than MAPP or propane*
- *Requires only one cylinder*
- *Economic substitute for oxy-acetylene*
- *Air-acetylene tote kits include extra tips and MC or B tote*

## OXY-ACETYLENE OUTFITS

TurboTorch oxy-acetylene outfits are manufactured by Victor, the undisputed leader in gas apparatus.

- *Medium or light duty welding, cutting and brazing tote outfits*
- *Torch outfits available with or without tanks*
- *Extensive line of cutting attachments, welding handles, tips and nozzles*
- *Unique tote design (small footprint), ergonomic handle and built-in storage compartments*
- *All outfits are completely compatible with Victor tips and components*
