

## Radnor MASTER by Tweco

### Comprehensive Selection

- 250, 350, 450 amp models available, each with the proven Tweco handle design
- Extended 80% duty cycles on Argon/CO<sub>2</sub>
- Easily configured for various power sources
- Tweco style front-end consumables

### Key Features and Benefits

Thick-walled, three layer conductor tube acts as a "heat sink," which increases durability

Conductor tube easily changed with an Allen wrench and can also be rotated depending on the application

Balanced to pivot at the center of the handle for ease of use in different welding positions, and thereby reduces operator fatigue

Steel spring strain relief enhances gun balance

Extended trigger length reduces radiated heat and protects the user

Radnor MASTER 250
